

Liferay Kick Start Implementation Program

MOVING STRAIGHT TO DEVELOPMENT

The Kick Start Implementation offering will jumpstart your DXP Cloud project straight to the development phase, by taking care of all project setup and configurations on DXP Cloud. Leveraging industry best practices gained through decades of experience, our Global Services team will set up all needed services and environments under our recommended guidelines, establish the source code pipeline with connections to CI/CD, and recommend SDLC adjustments to refine development procedures. Your development team can simply focus on project design and development, leaving the concerns of a proper services spin-up to our team. At the end of the engagement, our team will sit down with your team to provide a detailed summary on the setup and configurations, explaining the reasons and advantages of our approach, and to provide guidance on how to move forward with the DXP Cloud project to maximize productivity and project success.

Liferay provides full implementation services under a separate program. For additional details, please contact your account manager.

| What are the benefits? | How do we do it? | What will you get? |
|--|--|---|
| <ul style="list-style-type: none">• Get your project started right with a Liferay expert• Mitigate risk (Time/Tech/Project/Budget)• Focus on development rather than the preparation• Experience a higher level of overall project success• Peace of mind that the platform is optimized | <ul style="list-style-type: none">• Understand project goals and cater set ups and recommendations accordingly• Inventory of best practices in development and cloud DevOps approach• Expertise in DXP Cloud architecture and features | <ul style="list-style-type: none">• Project solution recommendations with best practices• An operational DXP Cloud environment setup for development• Secure SDLC review by our experienced staff• High availability and performance recommendations |

EVEN SUPERSTARS NEED TO BE COACHED ONCE IN AWHILE

In the Liferay Kick Start Cloud Implementation program, a Liferay professional will conduct a deep dive review of your project plan, and set up your DXP Cloud environments accordingly. The code pipeline along with the support of the CI/CD tool will be validated to ensure its adherence to our recommendations. The program also provides regular question and answer sessions, an inventory of development best practices, and industry experience in performance and stability that you would be hard pressed to find anywhere else. In addition, you gain access to Liferay expertise when you need it most: at project inception and final launch with our Go-Live program.
